Avera vCNE Ambulatory Care Series: Vaping

Presented by: Char Raley

*****An e-learning course available on the CE Portal *****

PROGRAM GOAL: Vaping is on the rise in the United States and recently there was an outbreak of lung injuries related to e-cigarette users. This session will focus on what is vaping, how to assess and interview the adolescent patient regarding vaping and patient education related to vaping.

TARGET AUDIENCE: Nurses and Medical Assistants

OBJECTIVES:
1. Identify patient education and patient resources related to vaping.
2. Review the hazards of e-cigarettes and vaping.
3. Recognize the signs of vaping

NCPD Outcome:
80% of nurses can self-report a knowledge gain related to vaping related health risks.
