

COVID-19 and Oxygen Delivery: What, When and How

Presented by: Lanny Baker, MBA, RT

*****An e-learning course available on the Avera CE Portal *****

PROGRAM GOAL: What is the best oxygen delivery method for the COVID-19 patient? In this training, we will discuss the what, when and type of oxygen to use in the treatment of COVID-19 patients. Demonstration of basic equipment will be included.

TARGET AUDIENCE: Physicians, Nurses

OBJECTIVES:

1. Identify oxygen and ventilation delivery methods for COVID-19 patients.
2. Explain use of Nasal Cannula, Non Re-breather and non-invasive oxygen delivery.
3. Describe how to use High Flow Nasal Cannula, CPAP, BIPAP, and Invasive ventilation equipment.
4. Review the set up and use of the oxygen and ventilation delivery methods.

NCPD Outcomes:

50% of nurses can self-report a change in practice within 90 days of education related to best oxygen treatment with COVID-19 patients

To successfully complete this activity and receive **1.00 CNE and/or CME**, you must:

- a. View the attached video
- b. Complete the verification
- c. Complete the evaluation

CME:

Avera is accredited by the Accreditation Council for Continuing Medical Education to provide continuing education for physicians.
