

Pediatric Management Heated High Flow

Enduring Material

** An e-learning course available on the Avera portal **

Program Goal

Healthcare teams in critical access facilities are utilizing heated high flow oxygen devices for the pediatric population in situations that would have otherwise required intubation or CPAP. This course will discuss what is heated high flow, what are the indications of heated high flow for the pediatric population, how to initiate heated high flow, how to monitor the patients on heated high flow, and how to wean pediatric patients on heated high flow.

Learning Outcomes

- 1 Define what is heated High Flow
- 2 Explain what are the indications of heated high flow for the pediatric population
- 3 Explain how to initiate heated high flow on a pediatric patient
- 4 Explain how to monitor a pediatric patient on heated high flow
- 5 Describe how to wean a pediatric patient from heated high flow

Outcome

100 % of participants will demonstrate knowledge of heated high flow oxygen use by passing post -test with score of $\geq 80\%$ by completion of the education.

Target Audience

Professions – Physician, Nurse - RN, Administration, Respiratory Therapist, Nurse - Nurse Practitioner, Physician Assistant, Nurse -LPN/LVN
Specialties – Emergency Medicine, Family Medicine, Pediatrics

Completion Requirements

- View the video
- Complete the post-test
- Complete the evaluation
